Political: Prob. CPC Member

Education

2021.9-2025.6

Wuhan University of Technology

E-Commerce | Bachelor

Honors: Model Merit Student, Outstanding Undergraduate Graduate, National Encouragement Scholarship; compulsory-course GPA 4.153/5; ranked 3/51 in major.

2025.9-2028.6

Wuhan University of Technology

International Business | Master

Awarded the First-Class Graduate Entrance Scholarship.

Project Experience

2025.12-2026.4

Intelligent Technology Service Research Integrating Knowledge Graphs and AI LLMs

Project: Built an LLM- and knowledge-graph-based intelligent service system for technology transfer in key sectors such as shipping, enabling precise matching between research outputs and industry demand.

Responsibilities: Collected and cleaned data across 20+ upstream and downstream shipping sub-sectors, building the underlying dataset for an industrial knowledge graph with 50,000+ entities and relationships.

Participated in LangChain-based Agent development; used Codex to support selected implementation tasks and optimized LLM calls, prompt design, and matching logic, reaching 85% Top-5 matching accuracy in test samples.

2026.1-2026.6

Wuling Motors Patent Service Agent Development

Project: Developed a patent-service intelligent agent for Guangxi Liuzhou Wuling Motors to support patent disclosure drafting, search-query generation, and patent search report generation.

Responsibilities: Mapped core needs of IPR and PE engineers across patent submission, disclosure drafting, novelty search, and report generation; helped define functional modules and business workflows.

Designed and debugged five prompt templates and generation rules, reducing initial disclosure drafting time from about two days to around ten minutes.

Campus Experience

2025.10-2026.7

MPA Student Office Assistant

Managed teaching materials for 200+ MPA students and archived 500+ examination papers.

Supported coordination of MPA admission interview volunteer activities, helping ensure smooth interview participation for 200+ candidates.

Relevant Skills

1. Programming and databases: Python, Java, MySQL, PostgreSQL.
2. AI tools and concepts: LLM, RAG, Agent, Prompt Engineering; hands-on experience with Coze, LangChain, and Codex.
3. Research and productivity tools: Word, Excel, PowerPoint, Tableau; able to structure data, documents, and presentations for research delivery.
4. Language and certificates: CET-6; C2 driving license.
